INTRODUCTION

Providing information, maps, funding and technical assistance to local governments, consultants, Resource Conservation Districts and non-profit organizations statewide with the goal of conserving the state's agricultural and natural resources.

--Division of Land Resource Protection's Mission Statement

The California Land Conservation (Williamson) Act

The California Land Conservation Act, better known as the Williamson Act, has been the state's premier agricultural land protection program since its enactment in 1965. The Williamson Act preserves agricultural and open space lands through property tax incentives and voluntary restrictive use contracts. Private landowners voluntarily restrict their land to agricultural and compatible open-space uses under minimum 10-year rolling term contracts with local governments. In return, restricted parcels are assessed for property tax purposes at a rate consistent with their actual use, rather than potential market value. In August of 1998, the Legislature enhanced the Williamson Act with the farmland security zone (FSZ) provisions. The FSZ provisions offer landowners greater property tax reduction in return for a minimum rolling contract term of 20 years. For more information about the Williamson Act please refer to Appendix B.

About This Report

This biennial report is a compilation of statewide enrollment data for the Williamson Act. The focus of this report is Williamson Act enrollment as of January 1, 2004 and January 1, 2005. However, enrollment data from prior years are included to provide context in certain discussions. Nearly all of the enrollment data were gathered from applications for payment under the Open Space Subvention Act. The applications are submitted annually to the Department of Conservation (Department) by participating counties and cities. Several cities that administer Williamson Act contracts do not submit applications. As such, the total amount of contracted land may be negligibly understated in this report. Appendix C contains the data tables used to generate the charts and graphics featured in this report.

A small amount of non-Williamson Act, enforceably restricted land is included in this report. Except for Appendix C, this "Other Enforceable Restriction" is mingled with the Williamson Act totals and accounts for less than one percent of the total reported acreage.

This report is mandated by State law and is primarily a report to the Legislature. However, this report is also made available to other audiences, including local governments, researchers, and interested statewide organizations. All audiences may find this report useful as a tool for educational purposes, for anticipating farmland conversion trends, for tracking land use trends, for facilitating program comparisons among participating local governments, and for demonstrating the Williamson Act's relative effectiveness.

I. ENROLLMENT SNAPSHOT: JANUARY 1, 2005

As of January 1, 2005, 16.6 million acres were enrolled under the Williamson Act statewide. This represents over half of California's farmland total of about 30 million acres, and nearly one-third of the state's privately owned land.

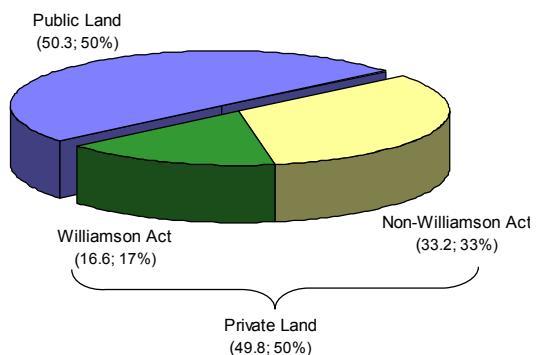

Of California's 58 counties, 54 have adopted the Williamson Act program (Alpine County and Los Angeles County have adopted the program, but have yet to execute a contract). Del Norte, San Francisco, Inyo, and Yuba Counties have not adopted the Williamson Act program as of the snapshot date.

The Farmland Security Zone (FSZ) program has been adopted by 25 counties, although not all of the counties have executed contracts. Twenty-one counties reported a total of 818,199 acres of land under FSZ contract, which constituted nearly 5 percent of the statewide Williamson Act enrollment.

On January 1, 2005, there were 314,880 acres of contracted land at some stage of the nonrenewal process. The cumulative nonrenewal acreage constituted 1.9 percent of statewide Williamson Act enrollment.

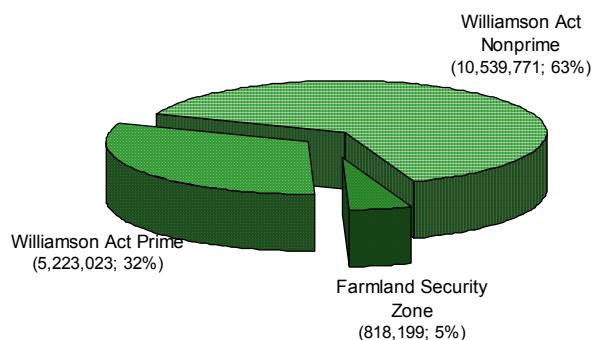

Participating local governments claimed \$38,808,296 in Open Space Subvention Act payments for the partial replacement of property tax revenue losses associated with contract enrollment as of January 1, 2005.

I. WILLIAMSON ACT REGIONS

II. ENROLLMENT CHANGE SUMMARIES AND TRENDS

Net Acreage Increases and Decreases

Net Enrollment Increase

The newest entry into the Williamson Act program, Modoc County, ranked No. 1 with the largest net enrollment increase for the third consecutive year, peaking in 2004. Relative newcomers Imperial, Merced and Sutter Counties have remained in the Top 10 but, along with Mono County, have reported an 80-90 percent reduction in net increase for 2004-05 compared to 2002-03.

Net Enrollment Decrease

Fresno County's net decrease in enrollment is largely due to public acquisitions of prime agricultural land – 10,865 acres in 2004 and 23,297 acres in 2005, most of which were completed by Westlands Water District as a result of a legal settlement with landowners involving water distribution. Sonoma County lost 16,728 adjustment acres in 2004 due to its correction for errors in records. It lost its Other Open Space Restriction Enrollment of 18,215 acres in 2005 in relation to the Department's audit of its Williamson Act program.

In 2005, net decreases for San Luis Obispo, Santa Clara and San Diego Counties were primarily due to public acquisitions. The California Department of Fish & Game (DFG) acquired 15,675 acres of nonprime land in San Luis Obispo County. State agencies, Santa Clara County, Santa Clara County Open Space and the Midpeninsula Regional Open Space District acquired most of 11,426 mostly nonprime acres in Santa Clara County, and DFG and the California Department of Parks & Recreation acquired 9,973 nonprime acres in San Diego County.

Statewide, the Williamson Act program grew by 80,061 acres in 2004 but had its first year-over-year decrease since 2000 in 2005 (-58,273 acres) for a two-year increase of 21,788 acres. In comparison, the Williamson Act program grew by 215,699 acres during 2002-03 and 367,317 acres during 2000-01.

New Enrollments

A new enrollment is the execution of a contract, resulting in an increase in the amount of restricted acreage.

New enrollments are filed with the anticipation of maintaining the contracted land in agriculture for at least ten years. As such, new enrollments may be seen as an indicator of agricultural stability in a particular location.

In 2004, the amount of new enrollments increased to 137,598 acres from 122,998 acres in 2003 but decreased to 69,529 acres in 2005, its lowest number since 1996. Although new participating counties Modoc, Merced, Imperial and Sutter continued to rank in the Top 10 in 2004, all but Imperial reported a decrease in new enrollments in 2005, with Sutter dropping out of the Top 10. The decrease from 2004 to 2005 is also reflected regionally throughout the State.

In 2004, Glenn and Colusa Counties continued to outpace other counties in the amount of new enrollments under FSZ contract as they did in 2002-03. The two counties accounted for 5,138 of 10,141 new enrolled FSZ acres. In 2005, Colusa did not enroll new FSZ acres, but Glenn accounted for 2,935 of 4,159 acres enrolled statewide.

Since 2001, when they peaked at 497,503 acres due largely to new participating counties, new enrollments have been trending down to a pre-2001 level. New FSZ enrollments, which began in 1999 and peaked in 2001 at 28,223 acres, have decreased by nearly 50 percent in comparison to the previous year in both 2004 and 2005.

Since 1991, the greatest amount of new enrolled acreage occurred in 2001 (497,503 acres) and the least amount in 1993 (60,193 acres).

Cross-Reference: Appendix C (p. 30, 31)

Total	137,598	Total	69,529

Farmland Security Zone Transfers

A farmland security zone (FSZ) transfer is the rescission of an existing Williamson Act contract with the concurrent creation of a FSZ contract on the same land. FSZ transfers do not result in a net change to the amount of contracted acreage within a county.

FSZ transfers signify a long-term agricultural commitment in particular areas. This commitment is made possible only upon deliberate action by the county in adopting the FSZ program and, subsequently, by the landowner in petitioning for the FSZ transfer.

In 2004, the amount of FSZ transfers decreased by 23 percent or 10,664 acres statewide compared to 2003. The San Joaquin Valley, however, led the state by a wide margin, more than doubling its transfers compared to 2003. Prime agricultural land accounted for 83 percent of the total FSZ acres transferred statewide.

In 2005, the amount of FSZ transfers decreased by 79 percent compared to 2004 to its lowest number since the program's inception in 1999. The San Joaquin Valley accounted for nearly all of the acres transferred. Three regions did not report any transfers. Although the number of acres was relatively small, 99 percent of the 2005 acres transferred was prime agricultural land.

Since 1991, the greatest number of FSZ acres transferred occurred in 1999 (209,480), the least in 2005 (7,444).

Cross-Reference: Appendix C (p. 25, 26)

Total	35,609	Total	7,444

Nonrenewal Initiations

The initiation of nonrenewal on a contract by either the landowner or the local government.

Nonrenewals are often filed with the anticipation of converting farmland to other uses. As such, nonrenewal trends may be seen as an indicator of likely farmland conversion in particular locations.

In 2004, the amount of acreage entering nonrenewal nearly doubled statewide to 60,994 acres compared to 2003. Kern County and the San Joaquin Valley and Santa Barbara and the South Coast & Desert Region led the increase. However, all regions experienced an increase in nonrenewal initiations compared to 2003.

2005 was generally a repeat of 2004. Statewide nonrenewal initiations increased 43 percent compared to 2004 to 87,159 acres, led by the San Joaquin Valley and South Coast & Desert Regions. However, Stanislaus County replaced Kern County as having the most acres entering nonrenewal. Imperial County, one of a group of recent new participating counties, joined the Top 10. Again, the increase in nonrenewal initiations occurred in all regions.

Statewide, nonrenewal initiations have increased each year since 2001 and in 2005 reached their largest amount since 1991. Yearly totals for 2004 and 2005 far exceed the yearly average of 26,178 acres for the previous eight years.

Since 1991, nonrenewal was initiated on the most contracted acres in 1991 (145,755) and the least in 1997 (15,259).

Total	60,994	Total	87,159

Nonrenewal Expirations

A nonrenewal expiration is the termination of a contract as a result of completing the nonrenewal process.

By far, most contracts are terminated through nonrenewal expiration. Upon the expiration of a contract, the restrictions are removed and the property tax assessment, which has been gradually increasing from the Williamson Act level over the nonrenewal period, returns to its full market value.

In 2004, the amount of contracted land terminated through nonrenewal expirations decreased from a low of 16,527 acres in 2003 to a new low of 11,997 acres, continuing a decreasing trend since 1999. Eight counties in the Top 10 were new entries, but the Sacramento and San Joaquin Valley Regions continued to rank No. 1 and No. 2.

In 2005, nonrenewal expirations nearly doubled over 2004 but remained well below the average of 59,638 acres for the current decade. Santa Clara County vaulted to the top ranking with nonrenewal expiration on five parcels in excess of 500 acres each and, with San Luis Obispo County, accounted for most of the acres expired in the Bay & Central Coast Region, which was the top ranking region. Yolo County continued to lose a relatively large number of acres through nonrenewal expirations, totaling approximately 34,000 acres since 2000.

Since 1991, the greatest amount of contracted acreage expired through nonrenewal in 1999 (118,391 acres) and the least in 2004 (11,997 acres).

Cancellations

A cancellation is the immediate termination of a contract by a landowner, which requires payment of a cancellation fee and board/council approval based on rigorous findings.

State law limits the use of cancellation to narrow conditions. Due to the specific findings required for a board or council to approve a contract cancellation, only a small fraction of yearly contract terminations occur as a result of cancellation.

In 2004, the amount of contracted land terminated through cancellation increased nearly six-fold compared to 2003 to 2,933 acres, its greatest amount since 1995. San Joaquin County and the San Joaquin Valley Region cancelled the vast majority of acres in 2004. The City of Lathrop in San Joaquin County cancelled 2,017 acres of prime agricultural land for residential development. The cancellation fee collected (excluding a parcel of 95 acres) was \$3,266,025.

In 2005, cancellations dropped to 1,018 acres, but this amount was still above the yearly average of 795 acres from 1996-2003. Shasta County's total cancellations for 2004-05 involved a single parcel of mostly nonprime agricultural land in each of the two years.

Statewide, cancellation acreage had been decreasing since 1999 to its low point of 161 acres in 2002, but has trended upward over the current three-year period. Since 1991, the greatest amount of acres cancelled occurred in 1995 (5,694), the least in 1994 (155).

Public Acquisitions

A public acquisition is the immediate termination of an enforceable restriction through eminent domain, or in lieu of eminent domain, by a public agency. The public agency may need to make specific findings and notify the Director of Conservation.

Williamson Act contracted land is acquired by public entities for a wide range of public improvements. Wildlife habitat, water resource management, public open space, and schools are common reasons for publicly acquiring contracted land. Before acquiring contracted lands, public agencies must make findings that there is no other noncontracted land reasonably feasible for the purpose, and that the lower cost of contracted land is not a primary factor in their decision.

In 2004, public acquisitions decreased to a more average level of 22,090 acres after record highs of 49,265 and 54,081 acres in 2002 and 2003 respectively. Fresno County's acquisitions involved mostly prime agricultural land (10,865 acres), most of which were completed by Westlands Water District as a result of a legal settlement with landowners involving water distribution. Acquisitions in Santa Clara County were divided among County, regional and federal entities. The US Forest Service accounted for all acreage acquired in El Dorado County.

In 2005, public acquisitions increased to a new high of 70,334 acres. All of Fresno County's 23,297 acquired acres were prime agricultural land and most were acquired by Westlands Water District. Acquisitions in San Luis Obispo County were by State Department of Fish & Game, which along with State Department of Parks & Recreation accounted for San Diego County's acquired acreage. A combination of State, County and open space districts acquired most of the acreage in Santa Clara County.

Statewide, excepting Fresno County, most publicly acquired acres in 2004-05 were nonprime agricultural land. Although public acquisitions decreased in 2001 and 2004 compared to the previous year, acquired acres have trended upward since 1998 to record highs, and public acquisition has exceeded nonrenewal expiration as the leading cause of contract acres terminated in each of the past four years, 2002-05.

Since 1991, the greatest amount of publicly acquired acres occurred in 2005 (70,334), the least in 1998 (9,493).

City Annexations

A city annexation is the succession or immediate termination of a contract upon the annexation of contracted land by a city. A valid city protest is required to terminate a contract, as determined by the local agency formation commission.

Certain contracts executed prior to 1991 may be terminated through city annexation only if the city filed a valid protest upon county notification at the time of contract formation. At present the total amount of contracted acreage covered by protested contracts statewide is unknown.

In 2004, the amount of contracted land annexed by cities decreased from 3,101 acres in 2003 to 1,931 acres, most of which were annexed by the City of Chino in San Bernardino County. Statewide, prime annexed acres outnumbered nonprime acres by more than two to one.

In 2005, the amount of contracted land annexed by cities decreased further to 958 acres, the lowest amount since 1997. Prime annexed acres outnumbered nonprime acres by nearly two to one. The City of Roseville annexed a parcel of 327 acres in Placer County. The City of Shafter annexed most of the acres in Kern County, and the Cities of Porterville and Visalia annexed acres in Tulare County.

Statewide, 2004-05 represents a sharp decrease in contracted acres annexed by cities compared to 2002-03, but the current decade has seen even more dramatic increases and decreases from year to year. Excluding the peak years of 1998-00, 2004 was about an average year, but 2005 was well below that average.

The greatest amount of annexed acreage occurred in 2000 (9,961 acres) and the least in 1992 (863 acres).

Net Adjustments

Adjustments may be the reconciliation of errors in records or previous reports, re-mappings or re-surveys, lot line adjustments, and/or parcel divisions.

Annually accounting for all of the changes that occur to the 16 million acre Williamson Act program is a big task performed by local governments. The net adjustments category is partly a byproduct of the elimination of errors that occur in local government enrollment data. The category is also a byproduct of imperfect forms that local governments must use to report enrollment data.

In 2004, Sonoma County lost 16,728 adjustment acres due to its correction for errors in records. Humboldt County gained acres for this reason, and Amador County lost acreage for a variety of reasons. Statewide, the net acreage lost was prime agricultural land. It was the largest net amount since 1995 and well above the average for previous years.

In 2005, Sonoma County lost its Other Open Space Restriction Enrollment of 18,215 acres in relation to the Department's audit of its Williamson Act program. Monterey and Orange Counties lost acreage due to errors in records and nonrenewals not reported in prior years. Statewide, most of the net acreage lost to adjustments was nonprime agricultural land. The amount of adjustments in 2005 of 32,205 acres represents an all-time high dating back to 1994. Net adjustments have exceeded nonrenewal expirations in 2004-05 in terms of reducing the amount of enrolled acres reported.

Since 1994, the largest net adjustment occurred in 2005 (32,205 acres removed) and the smallest in 1996 (4,394 acres added).

Contract Termination Trends

Statutorily, there are five ways to terminate a Williamson Act contract: nonrenewal, cancellation, public acquisition, city annexation, and easement exchange. For reporting purposes, acreage may also be removed on paper via "Net Adjustments".

Nonrenewal: The nonrenewal process is the most significant mechanism for the termination of Williamson Act contracted land. Since 1996, more contracted acreage has been terminated through nonrenewal expiration than all of the other methods of termination combined, a yearly average of 59,638 acres. Statewide, nonrenewal expirations have trended down since 1999, an average of 42,788 acres.

Public acquisition: Statewide, public acquisition has been the second leading cause of contract termination acreage over the current decade and has exceeded nonrenewal expiration for the past four consecutive years, 2002-05, a yearly average of 48,943 acres. Acquired acreage has trended upward since 1998, averaging 38,113 acres per year.

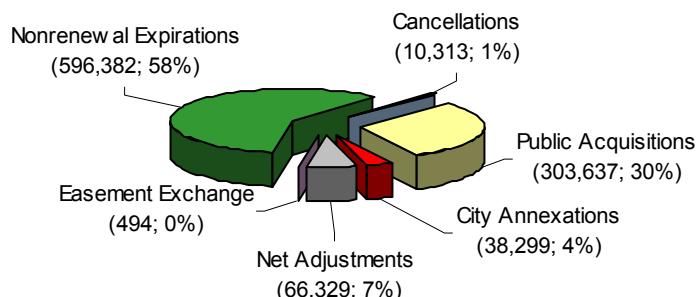

Net adjustments: A "Net Adjustment" is not a true method of contract termination. However, from 1996-05, net adjustments have averaged the removal of 6,693 acres per year statewide, with net removal occurring in six of the ten years and the removal for 2004-05 well above average.

City annexation: The actual amount of contracted land terminated through annexation is overstated since this analysis assumes that affected contracts are terminated, not succeeded to, upon annexation. Annexation acreage has fluctuated over the current decade. Excluding the peak years of 1998-00, which averaged 8,580 acres annexed, the 1,931 acres annexed in 2004 was a little above the average of 1,794 acres for the decade, but 958 acres in 2005 was well below average.

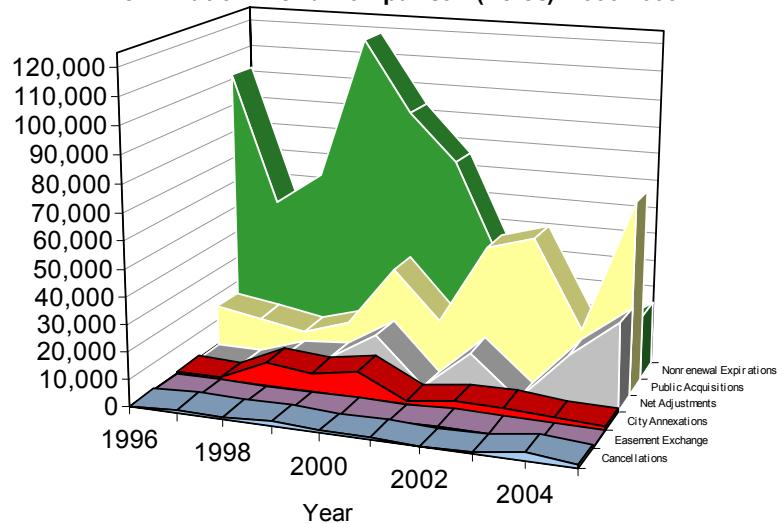

Cancellation: Statewide, cancellation acreage had been decreasing since 1999 to its low point of 161 acres in 2002, but has trended upward over the current three-year period. For the 1996-05 decade, the 2,933 acres cancelled in 2004 was more than double the average of 1,031, while 1,018 acres cancelled in 2005 was about average.

Easement Exchange: This method of contract termination became available in 1998. As of 2005, three Williamson Act easement exchanges have taken place. In those three exchanges, Williamson Act contracts were rescinded on 494 acres in exchange for the placement of agricultural conservation easements on 579 acres.

Cumulative Acres Terminated By Category: 1996-2005
(Acres; Percentage)

Termination Trend Comparison (Acres): 1996-2005

Cumulative Nonrenewal Trends

Cumulative nonrenewal acreage refers to the total amount of acreage undergoing the nine-year phase out of contract status at any one time.

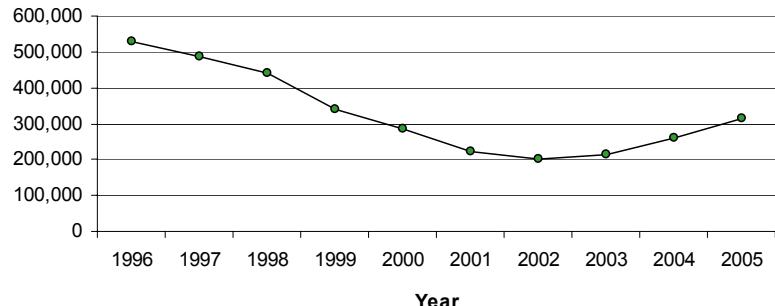

Statewide cumulative nonrenewal acreage peaked at nearly 700,000 acres (record high) in 1993 and then began a steady decline that ended in 2003 and has continued to rise in 2004-05. In 1993, statewide cumulative nonrenewal acreage made up 4.4 percent of the total statewide enrollment; in 2005 it was 1.9 percent. This ratio has been increasing over the three-year period 2003-05. Controlling for changes to total statewide enrollment, in 1993 there were 22 acres of continuing contracted acres per cumulative nonrenewal acre; in 2003 there were 76 acres; in 2005 there were 52 acres.

The middle graphic shows the prime/nonprime composition of the statewide cumulative nonrenewal acreage. Notably, the amount of cumulative nonrenewal acreage in both the prime and nonprime categories had been declining until 2003. Research has also shown that the proportion of prime/nonprime acreage within the cumulative nonrenewal acreage is similar to the statewide enrollment proportions. For example, in 2005 prime land represented 36 percent of the total statewide enrollment and 35 percent of the cumulative nonrenewal acreage.

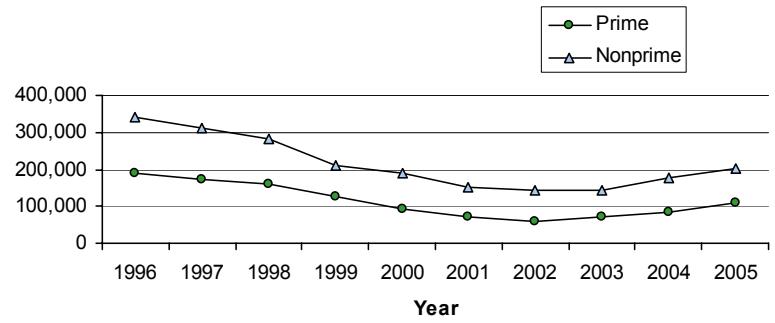

The bottom graphic shows the statewide cumulative nonrenewal acreage from a different perspective. In 2003, nonrenewal initiations exceeded expirations for the first time since 1993, which began a 9-year decline in statewide cumulative nonrenewal acreage. Beginning in 2003, cumulative nonrenewal acreage has been on the rise.

(Acres)

Cumulative Nonrenewal Trends

Cumulative nonrenewal acreage refers to the total amount of acreage undergoing the nine-year phase out of contract status at any one time.

In 2004-05 as in 2001-03, Orange County easily maintained its top ranking statewide in the percentage of its enrollment that is under the nonrenewal process. As of 2005, Orange County has 225 acres under continuing contract. Its Williamson Act program peaked in popularity in the early 1970s when it had over 77,000 acres under contract.

In 2004-05, counties in the South Coast & Desert and Foothill & Sierra Regions reversed positions from 2002-03 to again dominate the Top 10 rankings. Placer County moved up one rank from No. 3 in 2002-03 to No. 2 in 2004-05, initiating nonrenewal on 1,507 acres in 2004 and another 2,576 acres in 2005, approximately 32 percent of its total acreage in nonrenewal.

Farmland Security Zones

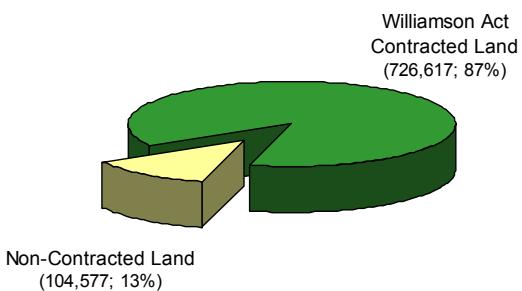

In August 1998, the farmland security zone (FSZ) provisions were enacted with the passage of Senate Bill 1182. The FSZ provisions offer landowners greater property tax reductions in return for a contractual commitment of at least 20 years.

As enacted in August of 1998, the FSZ provisions allowed for the creation of a FSZ contract only through the rescission of an existing Williamson Act contract. That requirement was changed on January 1, 2000, thus allowing non-contracted land to go straight into an FSZ contract. The graphic at right shows that most (87 percent) of the existing FSZ acreage was created through the rescission of existing Williamson Act contracts.

As of January 1, 2005, 21 counties had a percentage of their Williamson Act land under FSZ contract. This percentage ranged from 41 percent (Kings County) to 0.04 percent (Yolo County), with an average of 8 percent. Regionally, only the Sacramento Valley and San Joaquin Valley have greater than 2 percent of their total amount of contracted land under FSZ contract: 5.9 percent and 8 percent, respectively.

The FSZ program has continued to grow but at a much slower pace over the past three years 2003-05, increasing by 44,180 acres in 2004 and 11,222 acres in 2005. Since 1999, the FSZ program added the most acreage in 2000 (229,378 acres) and the least in 2005.

Open Space Subvention Act Payments (Millions): 1996-2005

III. OPEN SPACE SUBVENTION ACT PAYMENTS

Open Space Subvention Act

The Open Space Subvention Act provides for the partial replacement of local property tax revenues foregone as a result of participation in the Williamson Act and other enforceable restriction programs.

Since the first Open Space Subvention payments made in fiscal year 1972-73, the State has distributed over \$762 million to counties and cities in support of the Williamson Act program. The \$39,307,760 claimed in subventions and the 16,104,339 acres reported as eligible for subvention payment in 2004 represent increases over 2003. However, these figures declined in 2005 to \$38,808,296 and 15,926,181 acres. Actual subvention payments, which had been increasing since 1996, declined in 2004 and 2005.

While prime farmlands constitute about one-third of statewide enrollment, they accounted for roughly 73 percent of total subvention claims in 2005. Other enforceably restricted lands, including Open Space Easement lands that qualify for subvention payments, accounted for 0.1 percent of total subventions in 2005.

Not all Williamson Act contracted land is eligible for subvention payment. For example, local governments generally cannot claim subventions on contracted land that is under nonrenewal or valued for property tax purposes at Proposition 13 levels. In 2004-05, approximately 3-4 percent of the statewide enrollment was not eligible for subvention payment.

The Top 10 counties in terms of subvention entitlement remain fairly stable over the years. The eight San Joaquin Valley counties ranked No. 1 through No. 8 in 2004-05 as they did in 2003-04. The San Joaquin Valley contains about 44 percent of the total statewide Williamson Act enrollment and accounts for 59 percent of total subventions.

*Year 2005. Actual payment totals may differ slightly due to audit adjustments and/or enforcement actions

IV. COMPLIANCE AUDITS

In 1988, Williamson Act and Open Space Subvention Act program audits were initiated for participating Williamson Act counties and cities. At that time, the Department of Conservation contracted with the Department of General Services to conduct audits of several counties. As a result of those initial audits, approximately \$550,000 in subventions was recaptured for payments made on land not eligible for subventions and for cancellation fees paid to counties but not forwarded to the State. In fiscal year 1996-97, the Department began an annual Williamson Act/Open Space Subvention Act compliance audit program through contracts with the Department of Finance. From fiscal year 1996-97 to 2002-03, the State has invested nearly \$503,000 to conduct the annual audits. This investment has resulted in a return to the General Fund of more than \$1.9 million from the recapture of subvention overpayments and unpaid contract cancellation fees.

Claiming subvention on land not eligible for payment is the most frequent cause of subvention overpayments. This includes land starting through the contract nonrenewal process, and land valued lower under Proposition 13 valuation for regular Williamson Act contracts. Another problem area is when cancellation fees are collected by local governments and not transmitted within the statutorily required timeframe to the State Controller's Office.

Besides the subventions recovered by the audits, a major benefit is the correction of procedures for cities and counties that may not have followed the Williamson Act requirements and restrictions. The audit findings provide reassurance to both local governments and the State that the provisions of statute are being followed. Since 1972, over \$762 million in State subventions have been certified to local governments to provide replacement revenues for the loss in tax revenue and administrative costs resulting from participation in the Williamson Act program. The audit program provides a valuable check to ensure that the program is administered according to statute at the local level, and to carry out the State's fiduciary responsibility for a major investment by the taxpayers of California.

- **Fiscal year 1996-97** audits of Kern, San Joaquin and Tulare Counties recaptured \$65,087 in subvention overpayments. The audit also discovered a contract violation that led to the Department's initiation of legal action to remedy the violation. The resolution of the contract enforcement action resulted in a payment of \$100,000 to the California Farmland Conservancy Program Fund, and the money was subsequently used to fund acquisition of perpetual agricultural conservation easements.
- **Fiscal year 1997-98** audits of Fresno, Kings, Stanislaus and Madera Counties resulted in the recapture of \$165,607 in subvention overpayments.
- **Fiscal year 1998-99** audits of San Luis Obispo, Riverside, Monterey and Tehama Counties resulted in the recapture of \$958,497 in subvention overpayments. Of this amount, \$911,298 was for cancellation fees collected by Riverside County but not forwarded to the State Controller's Office.
- **Fiscal year 1999-00** audits of Colusa, San Diego and Yolo Counties resulted in the recapture of \$150,406 in subvention overpayments.
- **Fiscal year 2000-01** audits of Contra Costa, Glenn, San Benito, Santa Barbara and Tuolumne Counties resulted in the recapture of \$5,000 in overpaid subventions.
- **Fiscal year 2001-02** audits of Marin, Mendocino, Placer, San Bernardino and Santa Clara Counties resulted in the recapture of \$57,980 in subvention overpayments. The audits also generated a subsequent review that resulted in the recapture of \$407,885 in subvention overpayments beginning in fiscal year 2004-05.
- **Fiscal year 2002-03** audits of Sacramento, Ventura, Solano, Kern, Mariposa and Siskiyou Counties resulted in the recapture of \$11,125 in subvention overpayments.

APPENDIX A. SIGNIFICANT LEGISLATION

Summary of Significant Legislation Effective January 1, 2004

Assembly Bill 1492 (Laird, Chapter 694, Statutes of 2003)

- AB 1492 added Section 51250 to the Government Code. Section 51250 provides an additional and alternate remedy to the contract cancellation petition (§51281-et. seq.) for a material breach of contract. Additionally, AB 1492 amends Section 51257 by extending the Williamson Act lot line adjustment provisions to January 1, 2009.
- Section 51250(b) defines a material breach on land subject to a Williamson Act contract as a commercial, industrial or residential building(s), exceeding 2,500 square feet that is not permissible under the Williamson Act or contract, local uniform rules or ordinances. AB 1492 only applies to structure(s) that have been permitted and constructed after January 1, 2004.
- If upon evidence presented at a public hearing the city/county determines a breach of contract has occurred, the city/county shall either order the landowner to eliminate the breach condition within 60 days or assess a monetary penalty. The monetary penalty shall be 25% of the unrestricted fair market value of the land rendered incompatible by the breach, plus 25% of the value of the incompatible building and any related improvements on the contracted land.
- While it is the County's responsibility to enforce the sanctions contained in Section 51250, the Department is also empowered to take actions against breaches of contract.

Summary of Significant Legislation Effective January 1, 2005

Senate Bill 1820 (Machado, Chapter 794, Statutes of 2004)

- Assessors determine the current fair market valuation of land to determine the cancellation fee required to remove land from a Williamson Act contract. Existing law allowed a petitioner the right to appeal the current fair market valuation of the cancellation fee to the county board of equalization.
- SB 1820 deletes the petitioner's right to appeal and requires the assessor to notify the petitioner and the Department of the current fair market valuation of land to be removed from contract. If either the petitioner or the Department believes the valuation to be inaccurate, either party may request the assessor to conduct a formal review of the current fair market valuation. SB 1820 also sets forth procedures for formal review and any re-computation of the cancellation fee.

APPENDIX B. ABOUT THE WILLIAMSON ACT

The California Land Conservation Act, better known as the Williamson Act, has been the state's premier agricultural land protection program since its enactment in 1965. Over 16 million of the state's 30 million acres of farm and ranch land are currently protected under the Williamson Act. The Williamson Act statute is located in the California Government Code beginning with Section 51200.

Following World War II, California experienced tremendous population and economic growth. This growth, in tandem with the State's property tax system, led to increased pressures to convert agricultural land to urban use. Rapidly escalating property taxes often presented a prohibitive burden for farmers who wanted to maintain their agricultural operations. In response, the California Legislature passed the Williamson Act in 1965 to preserve agricultural and open space lands by discouraging premature and unnecessary conversion to urban uses. The Williamson Act was then, and remains today, a highly innovative policy that tackles the problem of agricultural land protection through an interrelated set of property tax, land use, and conservation measures.

Fundamentally, the Williamson Act is a State policy administered by local governments. Local governments are not mandated to administer the Act, but those that do have some latitude to tailor the program to suit local goals and objectives. The State's support of the program is strong and enduring – expressed in the language of the Act, in the authority granted to local governments, in the State subventions, and in the recent enhancements to the Act that further promote farmland and open space protection.

A three-way relationship between private landowners, local governments, and the State is central to the Williamson Act. Local governments and landowners voluntarily enter into a contract in which each accepts certain costs in return for other benefits. The landowner forgoes the possibility of development, or converting his or her property into nonagricultural or non-open space use during the term of the contract, in return for lower property taxes. The local government foregoes a portion of its property taxes in return for the planning advantages and values implicit in retaining land in agriculture or open space. The State is also a key player in the program. The State supports local governments and landowners in the form of technical and implementation assistance, interpretation of the Act, subventions to local governments, research of issues and policies, contract enforcement, and preparation of the Williamson Act Status Report.

Williamson Act contracts have an initial term of ten years, with renewal occurring automatically each year (Local governments can establish initial contract terms for longer periods of time). The contracts run with the land and are binding on all successors in interest of the landowner. Only land located within an agricultural preserve is eligible for a Williamson Act contract. An agricultural preserve defines the boundary of an area within which a city or county will enter into contracts with landowners. The boundary is designated by resolution of the board of supervisors (board) or city council (council) having jurisdiction. Preserves are regulated by rules and restrictions designated in the resolution to ensure that the land within the preserve is maintained for agricultural or open space use. The rules of each agricultural preserve specify the uses allowed. Generally, any commercial agricultural use will be permitted within any agricultural preserve. In addition, local governments may identify compatible uses permitted with a use permit. Landowners interested in enrolling land in a contract should contact their local planning department for application forms and instructions.

In August of 1998, Senate Bill 1182 established the Farmland Security Zone (FSZ) provisions of the Williamson Act. An FSZ is an area created within an agricultural preserve by a board upon request by a landowner or group of landowners. FSZ contracts offer landowners greater property tax reduction in return for an initial contract term of twenty years, with renewal occurring automatically each year. Land restricted by an FSZ contract is valued for property assessment purposes at 65 percent of its Williamson Act valuation, or 65 percent of its Proposition 13 valuation, whichever is lower. New special taxes for urban-related services must be levied at an unspecified reduced rate unless the tax directly benefits the land or living improvements. Cities and special districts that provide non-agricultural services are generally prohibited from annexing land enrolled under an FSZ contract. Similarly, school districts are prohibited from taking FSZ lands for school facilities. The FSZ provisions of the Williamson Act begin at Section 51296 of the California Government Code.

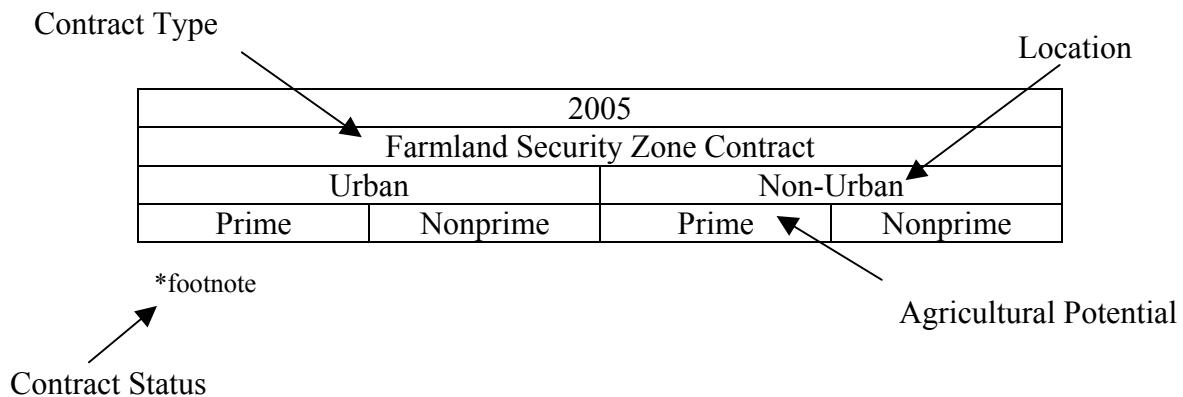

APPENDIX C. DATA TABLES

Data Notes

The following charts were omitted since no acreage was reported: Nonrenewals Withdrawn (FSZ, 2004/2005)

Explanation of Enrollment Categories

The Status Report shows changes to over seventeen categories of enrollment. These enrollment categories may be described by a combination of four factors: contract type, contract status, location, and agricultural potential.

Contract Type

Contract type refers to the nature of the restriction covering the land. The contract types are:

- Land Conservation Act Contract
- Farmland Security Zone Contract
- Agricultural Conservation Easement
- Other Enforceable Restriction

Contract Status

Contract status indicates whether the contract is under nonrenewal. If so, then its contract status will be "Nonrenewal"; otherwise, its status will be "Continuing".

- Nonrenewal
- Continuing

Location

This factor is only relevant to FSZ enrollment for subvention payment purposes. FSZ contracted land that is within a city's sphere of influence, or within three miles of the exterior boundaries of a city's sphere of influence, is "Urban". All other FSZ contracted land is "Non-Urban".

- Urban
- Non-Urban

Agricultural Potential

Agricultural potential refers to the actual or potential agricultural productivity of the land being restricted. Contracted land that meets the Williamson Act definition of prime agricultural land is "Prime". All other land is "Nonprime".

- Prime
- Nonprime
